

A booster shot will increase your immune response.

**YOU CAN GET THE PFIZER, MODERNA, OR THE J&J
COVID-19 VACCINE BOOSTER SHOT IF:**

**You're age 12 and older and you received 2 doses
of the Pfizer vaccine over 5 months ago.** ✓

OR

**You're age 18 and older and you received 2 doses
of the Moderna vaccine over 6 months ago.** ✓

OR

**You're age 18 and older and you received
the J&J vaccine over 2 months ago.** ✓

The Pfizer or Moderna vaccine are preferred in most
situations over the J&J vaccine.

Children and teens age 12–17 can **only get a Pfizer booster shot.**

**Adults age 18 and older can choose the Pfizer, Moderna, or J&J COVID-19
vaccine for their booster shot **regardless** of which vaccine they initially received.**

**People should talk to their health care provider about whether a booster shot is
appropriate for them.**

A booster shot is administered to increase the immune response of people who have completed the recommended number of initial doses for a COVID-19 vaccine.

WHO CAN GET A COVID-19 BOOSTER SHOT?

Children and teens age 12–17 can **only** get a Pfizer booster shot.

Adults age 18 and older can choose the Pfizer, Moderna, or J&J COVID-19 vaccine for their booster shot **regardless** of which vaccine they initially received.

People should talk to their health care provider about whether a booster shot is appropriate for them.

COVID-19 Vaccine Additional Primary Dose

FloridaHealthCOVID19.gov

An additional primary dose is administered to improve moderately to severely immunocompromised people's immune response to their initial two-dose series of the Pfizer or Moderna COVID-19 vaccine.

YOU CAN GET AN ADDITIONAL PRIMARY DOSE OF THE PFIZER OR MODERNA COVID-19 VACCINE IF:

**You received 2 doses of the Pfizer vaccine
over 28 days ago and**
You're moderately or severely
immunocompromised*,
And you're age 5 and older.

OR

**You received 2 doses of the Moderna vaccine
over 28 days and**
You're moderately or severely
immunocompromised*,
And you're age 18 and older.

You should use the same COVID-19 vaccine (Pfizer or Moderna) that you received initially for your additional primary dose. Unlike a COVID-19 booster shot, the Pfizer and Moderna vaccines are not interchangeable for an additional primary dose.

People should talk to their health care provider about whether an additional primary dose is appropriate for them.

At this time, an additional primary dose is not recommended for people who received the J&J COVID-19 vaccine.
